Oct. 24, 2018

**Sage** a provider of cloud business management solutions, spotlighted three new innovations onstage at Advantage 2018, Sage Intacct's customer and partner conference taking place in Nashville, TN. These new solutions reinforce Sage's commitment to investing in technologies that address its customers' toughest financial management challenges.

"Our pace of innovation and history of rolling out industry-first products is unmatched in our field – and a major reason why customers enjoy working with Sage Intacct. We've consistently delivered quarterly releases for years, and unlike on-premise and some cloud solutions that slow over time, we've continued to introduce substantial, innovative offerings that make our customers successful," said Aaron Harris, senior vice president and head of engineering and technology, Sage Intacct.

“In fact, we’ve introduced more than 150 product enhancements in the past year

Introduced in limited release in September, [Sage Intacct Budgeting and Planning](#) is a powerful, yet easy to use, cloud-based financial budgeting and planning solution that streamlines and improves the budget planning process. It is designed for small and midsize businesses that have outgrown spreadsheets and email for collaborative planning but don’t have the time and money to implement and manage an enterprise-scale solution.

Sage Intacct Budgeting and Planning improves organizational alignment, reduces wasted resources, and improves security. It enables organizations to collaborate on the latest version of the plan or budget in a single secure application.

### ***Interactive Custom Report Writer to Increase Business Agility, Improve Operational Insights***

Sage today also introduced Sage Intacct Interactive Custom Report Writer, a modern, visual reporting tool built to increase the flexibility and agility required to improve business insights and day-to-day operations.

The new module enables users to build custom reports quickly and easily with hierarchical field selection, drag-and-drop functionality, and automatic formatting and simple subtotalling. The rich interactivity enables users to pivot, filter, sort and expand data to answer specific business questions. Interactive Custom Report Writer also addresses more complex needs, implementing rolling sums and aggregations, as well as functionality that easily reorganizes and summarize data with pivot tables. It also offers conditional formatting and color selection to draw attention to the most important data and trends to improve report usability.

### ***Sage Intacct General Ledger Allocations Allows Customers to Streamline Complex Close Process With Confidence***

Like most close-related activities, allocations can be arduous, time-consuming, and

organization performance and eliminating cumbersome spreadsheets.

Organizations save time by setting up sophisticated allocations once and then dynamically generating future allocations with the press of a button. This ensures consistent, automated processing to reduce errors, streamline audits and drive significant time savings.

### Availability
