File Information Returns Electronically

Our 1099 software creates files in the format required by the IRS for electronic transmission. The system is updated each year to reflect the format changes that are made by the IRS.

1099FIRE is the only company to offer OneTouch™ E-Filing. Just click a button and the software will automatically log in and upload your file to the IRS FIRE system. You will receive verification within seconds of receipt of your file.

Filing Information Returns electronically is very cost-effective, is easier than filing on paper, and is more accurate. Filing status is available within 2 business days for Forms 1098, 1099 and W2-G and electronic filers receive a later due date for most returns.

When you file electronically, you are exempt from using pre-printed forms. You can just print the return in regular paper or email a PDF file to all recipients.

Corrections

If you make a mistake on an information return, a correction should be filed as soon as possible. Our 1099 software will create corrected replacement files for electronic submission. We follow the instructions on amending information returns filed electronically or magnetically, refer to Part A, section 11, of Publication 1220.
