Accounting Firms

BQE is the first company to release an AI for accounting and professional services firms that goes beyond being a voice input and functions as an intelligent business analyst. Instead of just providing simple answers to a user's questions ...

Isaac M. O'Bannon • Jul. 10, 2019

BQE Software, Inc. has launched **Core Intelligence**, an Artificial Intelligence tool that allows users to have human-like conversations with their business software to

gain actionable insights about their company and perform work-related tasks.

“Core Intelligence will change the way we manage our business and make our business decisions,” said Shafat Qazi, founder and CEO of BQE Software. “By simply talking to our software, Core users can be pro-actively informed about their company financials, project status, bottlenecks, and the rainmakers. This intelligence empowers us to make smarter business decisions and allows them to make the right decision, all the time, every time!”

Core users can access Core Intelligence through any of their smart devices connected to Google Assistant, such as the Google Home app on their phones, a Google Home smart speaker, or even a vehicle with Google Assistant connectivity. This allows them to use only their voices to get work done anywhere, instantly.

“Our goal with Core Intelligence is to provide a better business experience with less administrative work, and artificial intelligence, powered by Core, makes that possible,” said Setareh Motamedi, VP of Marketing at BQE Software. “The business world moves at the speed of light these days, so we want to free our customers from the shackles of a desk so they can be mobile and efficient while staying connected to their business. Core Intelligence gives our users the advantages of having their very own business analyst without the overhead. They can simply have a conversation with their software without even needing to log-into a computer, spend time shuffling through reports, or trying to make sense of tons of data to get deep insights.

As customers expect top-notch service from firms, firms should be prepared to
