Oct. 01, 2019

**Invoiced**, a provider of Accounts Receivable Automation, has announced the addition of new capabilities for subscription billing, cash collection forecasting and user access management. The new features significantly expand on the company's already class-leading accounts receivable automation platform.

The new subscription billing module provides world class capabilities for saas, service-based companies and other recurring revenue businesses and includes:

- Integrated sign-up pages that enable end customers to choose service levels and add-ons as well as pay and accept terms of service
- The ability to bundle existing products, services and other items into subscription plans
- A wide variety of subscription customizations including billing dates, term lengths, renewal rules, renewal terms and much more

- Fixed, variable and combination billing including the ability to automatically or

- Segmented, customizable views of predicted cash collections by Due Date, Promises-to-Pay, AutoPay and Installment Plan Payments
- Forecast trends by week with configurable end dates

The new access management capabilities provide IT managers and Invoiced administrators with the ability to surgically constrain which teams and individuals have access to view and change information and includes:

- Highly granular, configurable settings for managing view, creation, editing and deletion permissions for estimates, invoices, payments, credit notes, tasks, reporting and much more
- The ability to create custom roles with more than 8 trillion possible combinations of access permissions

“With our new capabilities for subscription billing, cash forecasting and access management, we’re stepping up to address the challenges and A/R acceleration opportunities raised by our increasingly diverse and sophisticated customer base,” said Jared King, co-founder and chief executive of Invoiced. “These new features and many others further distinguish Invoiced as a true, end-to-end platform, and set us apart from more narrowly focused products and tools,” he added.

“In short order Invoiced has helped us transform our billing and collections operations from a slow and painful process to one that’s almost entirely on autopilot,” said Michael Mogill, president and chief executive officer for Crisp Video. “With Invoiced’s new subscription billing, cash forecasting and access management we have a level of automation, control and visibility into our A/R operations that we didn’t realize was possible, he added.”

The new subscription billing, cash forecasting and access management features are
