Oct. 16, 2019

Bill.com, a leading provider of AI-enabled cloud software that simplifies, digitizes, and automates complex financial operations for small and midsize businesses, today announced a new set of offerings for its platform, increasing efficiency and convenience for accounting firms and their clients.

The new capabilities include support for a centralized, PO-to-payment workflow; advanced customer support; expanded coverage for cross-border payments; a VIP program for International Payments customers with competitive exchange rates; and

increased collaboration with partners including Oracle NetSuite, Sage Intacct, and

- **Bill.com purchase orders** – This new platform innovation syncs POs directly from Oracle NetSuite and Sage Intacct into the Bill.com platform. Accountants and their clients can compare POs and invoices on one screen, then route bills for approval and payment seamlessly in the same workflow. This eliminates the need to switch between systems for two-way matching and reduces the back-and-forth communication between PO creators and AP managers. Bill.com Purchase Orders is a more efficient and less error-prone way for finance teams to manage their end to end PO-to-payment workflow.
- **Expanded International Payments** – This capability increases coverage for cross-border payments and now encompasses more than 130 countries and 106 currencies. It also includes a new VIP program for qualified accounting firms and clients that conduct high-volume transactions. Qualified customers receive personalized services for account set up, complimentary exchange rate analysis, and access to special rates. With Bill.com International payments, accountants and their clients can use one centralized payment and approvals process for both international and domestic vendors, for greater visibility, convenience, and control.
- **Multiple client bill approval through the Accountant Console** – Accounting firms can see all client bills waiting for their approval in one place and approve them without having to log in to each individual client account. With this feature, accountants can keep an eye on bills that require immediate attention and act quickly across multiple client accounts.
- **Grid view of bills** – Accountants can now opt to see small images of documents in the new Bill.com inbox when they log in, allowing them to maximize efficiency and increase control.
- **Premium Customer Support:** This option includes enhanced support service level options, along with newly introduced training and education services, to optimize

workflows and help customers get the most out of Bill.com. Accounting firms can
