understand and experiment with AI technology. The Armanino AI Lab Resource Center allows businesses to leverage those resources to improve six mission-critical processe

Nov. 01, 2019

Armanino LLP, one of the 25 largest accounting and business consulting firms in the U.S., today announced its AI Lab Resource Center is now live for registered members, offering a collaborative community where business leaders can gain a sustainable, competitive advantage in the marketplace by learning about artificial intelligence (AI) and how to apply practical AI solutions to workplace operations using robotic process automation, predictive analysis and virtual assistants.

"Members are able to move past the theoretical AI conversations and get straight

providing educational resources and actionable advice under Trends & Articles, Business Scenarios and Tech Talks.

Armanino's AI Lab, which launched in May, is the centralization of resources to learn, understand and experiment with AI technology. The Armanino AI Lab Resource Center allows businesses to leverage those resources to improve six mission-critical processes: Customer Experience, Supply Chain Management, Finance & Accounting, Talent Management, Risk Management and Privacy.

"Armanino's AI Lab was created with the understanding that nearly 80% of business leaders know the importance that AI will play in the future, but they are at a loss for how to apply it to their own company," said Matt Armanino, CEO of Armanino LLP. "The resource center creates an immersive and supportive environment for those leaders to develop the automated future that's right for their business."

Benefits of AI Lab membership include:

- **Peer-to-peer meetings** – Access to a community of like-minded, innovative business executives seeking to leverage AI to create sustainable, competitive advantages for their organizations
- **Corporate visits** – Hosted executive team visits to Armanino's headquarters, with customized AI learning sessions focused on members' specific goals and requirements
- **Educational microsite** – Members-only access to a robust library of resources, including white papers, product reviews and proof-of-concept case studies vetted by our team of data scientists
- **Proof-of-concept models** – Opportunity identification for AI applications, customized to fit the needs of each AI Lab member
- **Pooled AI resources** – Access to Armanino's AI technology, developers and data scientists
