**Brian Tankersley** • Feb. 13, 2020

While most of our firms have transitioned away from paper-based records, many of us still struggle to digitize the business processes in our firms. As I write this, we are in the late stages of conducting the 9<sup>th</sup> Annual CPA Firm Operations and Technology Survey, a groundbreaking survey of practitioners which I've worked on since 2013. The results this year show that technology, security, and processes are on the minds

of the executives who participated this year, and that includes how your firm

1 (tie)	Workflow and efficiency	21.9%
	Getting your clients onboard	
3	working with the firm in a more digital way	16.8%
4	Creating and implementing an effective technology strategy	10.2%
5-12	Eight other answers (none above 6.7%)	29.2%

***Source: Preliminary data from the 6<sup>th</sup> Annual Accounting Firm Operations and Technology Survey***

As I analyze these results, it strikes me as important that over 60% of the respondents selected one of the top three answers (security, workflow and efficiency, and getting your clients onboard working with the firm in a digital way). The top three responses relate directly to the internal operating processes in a firm, which are very difficult to manage and make consistent throughout the organization, and are directly related to how a firm uses technology to standardize, automate, track, and report on the work.

If your firm's processes look anything like what you did back when you kept your client documentation on paper, you have some work to do. The way accounting firms use technology in 2019 should be very different from how you did the same things in the 20<sup>th</sup> century; for client documentation, paper has given way to portals; signatures have gone digital; faxes and memos have mostly given way to encrypted e-mail; workflow tracking systems have replaced paper logs and routing slips; organizers have morphed into portals; and more frequent video meetings have replaced time-consuming face to face meetings for many routine interactions.

While you don't have to change every one of your processes now, it's important that

Workstream, Thomson Reuters FirmFlow, Doc-IT DM, OfficeTools Workspace, Pascal Workflow, and Karbon.

- **Automated Document Gathering** – Apps in this segment will retrieve transactions, statements, and other data automatically from sources online. Examples include Hubdoc, Drake's GruntWorx Gather, SurePrep TaxCaddy, Intuit Link, Receipt Bank Fetch, FileThis Fetch, AccountantsWorld's integration with Entryless, and CCH Axcess My1040Data.
- **Data Extraction** – These tools recognize information in scanned and downloaded documents like receipts, invoices, and statements, and then convert this unstructured data into structured data so it can be analyzed and imported into other applications. Popular tools in this area include Receipt Bank, SurePrep 1040Scan, CCH ProSystem *fx* Scan, Concur, CCH Audit Accelerator, Expensify, and Zoho Expense.
- **Portals** – These tools provide a digital interface for your clients to use when they are interacting with your people and can track the status of schedules requested to be prepared by your clients ("the PBC lists"). Widely used solutions include Citrix ShareFile, Thomson Reuters NetClient CS, CCH Axcess Portal, Doc.IT Portal, Karbon, and XCM Portal.

If you're not looking for ways to improve your processes and customer experiences every day, you're sitting still or falling further behind. Digital transformation isn't just something for Fortune 500 companies – it's a goal for everyone. I hope you are experimenting with new and inventive ways to automate more and more of the data entry and other busy work your firm.
