From the [2020 review of inventory management systems](#).

inFlow Inventory is well-suited for retailers, distributors, and online merchants of any size. inFlow is available as a cloud application, although there is a basic version that can be installed on desktop systems if desired. inFlow is scalable, with four plans available, including an Enterprise plan that is ideal for larger businesses that need to manage inventory from multiple locations.

inFlow Inventory also includes a mobile app that allows users to check inventory levels and also check products into and out of inventory using the barcode scanner that is included in the app. The mobile app is compatible with both iOS and Android

devices. inFlow includes asset tracking capability once users create specific

establish a reorder point, assign the product to a location, and add measurements, if desired.

inFlow Inventory allows users to create a serialized product, purchase serialized product, and both sell and track a serialized product. The application supports multiple currency and multiple languages, and the customizable dashboard allows users to track all inventory and asset transactions from a single screen. inFlow Inventory supports kitting, assembly, bill of materials and work order processing, with complete barcode scanning capability available in the application's mobile app.

inFlow Inventory supports multiple pricing schemes, with users able to include a normal price, a retail price, as well as the option to create additional pricing details as desired.

Markup

pricing percentages can also be assigned to pricing levels, with both bulk pricing and volume pricing options offered in the application as well.

inFlow includes reports in four categories; Sales, Purchasing, Inventory, and Admin. Inventory reports include an Inventory Summary, Inventory Details, Product Price List, Product Cost Report, Inventory by Location, and Inventory Movement Details. Various sales reports include Sales by Product Summary, Customer Payment Summary, Customer Payment Details, and a Customer Order History. All inFlow reports can be previewed on screen, printed, saved as a PDF, or exported to Microsoft Excel or as a CSV file for additional customization.

inFlow also offers complete purchasing and sales capability, including purchase orders, vendor management, sales quotes, sales orders, and complete customer management. Seamless integration with online e-Commerce solutions such as Shopify, Amazon, Woo Commerce, and Squarespace provides automatic updating of inventory levels every time an order is placed. inFlow Inventory also allows users to track all freight costs associated with shipped orders, track partial shipments, and manage online payments. inFlow also offers seamless integration with QuickBooks Online will send all sales orders created in inFlow directly into QuickBooks Online.

inFlow's support page includes a searchable knowledge base, where users can type in a question or enter a search term. Users can access the Quick Start Guide, the FAQs page, and a Full Start Guide, and the support page also includes access to numerous educational videos that provide an overview of the application. A complete demo of

the application is also available, as are pre-recorded webinars on a variety of topics.,
