integrates seamlessly with a variety of popular cloud services to provide a convenient and comprehensive solution for ScanSnap customers.

Mar. 10, 2021

Fujitsu Computer Products of America, Inc., a maker of imaging solutions, has announced the introduction of the ScanSnap iX1600 with ScanSnap Cloud. ScanSnap Cloud integrates seamlessly with a variety of popular cloud services to provide a convenient and comprehensive solution for ScanSnap customers.

Together, this solution allows you to digitize, save and organize documents, business

documentation, scanning to the Cloud improves business value through shared data insight with one-touch easy access anytime and anywhere."

The intuitive nature of this functionality will change the way businesses operate, improving workflows and organizational processes across different industries, such as legal, accounting, real estate and financial. This allows you to seamlessly incorporate your paper-based process into your electronic workflow.

"The introduction of the ScanSnap iX1600 and its integration with ScanSnap Cloud could not come at a better time," said Josh Landzberg, Co-Founder of Property Matrix. "We're seeing more and more businesses move to cloud-based workflows to improve collaboration. Especially considering the recent COVID-19 pandemic, most office-based employees are now working remotely and many plan to stay remote in the months or years to come, increasing the importance of scanners that offer an easy onramp for documents to the cloud."

With ScanSnap Cloud, each document is automatically digitized, uploaded, named based on content type (when possible) and saved where it belongs, empowering remote teams who may be working in disparate locations. ScanSnap Cloud currently works with 14 cloud enabled partners including:

- **Box** – Simplify how you work with one platform for secure content management, workflow, and collaboration. Box is how the most demanding enterprises drive digital transformation with Enterprise Grade Security.
- **Dropbox** – Is a modern workspace designed to reduce busywork so you can focus on the things that matter. Sign-in and put your creative energy to work.
- **Evernote** – Evernote is a powerful tool that can help executives, entrepreneurs and creative people capture and arrange their ideas.
- **Google Drive** – Store, share, and access your files and folders from any mobile device, tablet, or computer — and your first 15GB of storage are free.

- **Microsoft OneDrive** – One place for everything in your life, easy to store and share

friendly property management solution.

By connecting wirelessly to your computer and smart devices, you can send digitized documents to the cloud for quick access anytime, anywhere PC-free, and use the iX1600 directly with iOS and Android enabled smartphones and tablets, sharing documents quickly and easily to the most popular cloud destinations, or by saving to your computer.

"A majority of our customers are moving to cloud-based workflows in order to better manage their accounting processes," said Chris Knight, API Specialist at Xero. "ScanSnap's integration with Xero's Hubdoc is incredibly intuitive, making it simple to pull data from receipts and reducing the manual labor of data entry that is traditionally required. The system also automatically labels and organizes invoices into the right folder so that accountants can quickly access the information they need, no matter where they choose to work."

"Leveraging the ScanSnap Cloud from the ScanSnap iX1600 is changing the game for property managers using Property Matrix," said Josh Landzberg, Co-Founder of Property Matrix. "Property managers are constantly struggling with paperwork and reporting as well as managing multiple locations effectively. A scanning with the iX1600 gives them a quick and easy solution to manage their documents electronically. This capability is a huge value to their daily workflow."

Managing cases, client records and billing has been a paper-driven business for years. Our software helps manage these processes digitally, but as the on-ramp for digitalization, simple one-touch scanning with the ScanSnap iX1600 is the first step for a majority of our clients in the legal industry. Together, this integration can save them time, improving workflows and profitability by keeping their team focused on billable work instead of administrative tasks.

While extremely beneficial for businesses, the power of the new ScanSnap iX1600

truly easier than ever, bringing the physical documents that surround us into the digital world where we can save, post and share them with family and friends.

The ScanSnap iX1600 was recently introduced, and is available in black or white for $495.00 USD. It was introduced alongside a USB-only model, ScanSnap iX1400 available in black for $395.00 USD. Both versions integrate with ScanSnap Cloud and the company's software vendor partners, improving productivity and efficiency from anywhere.
