choice of accountants surveyed, followed by lower costs and faster delivery.

Isaac M. O'Bannon • Nov. 02, 2022

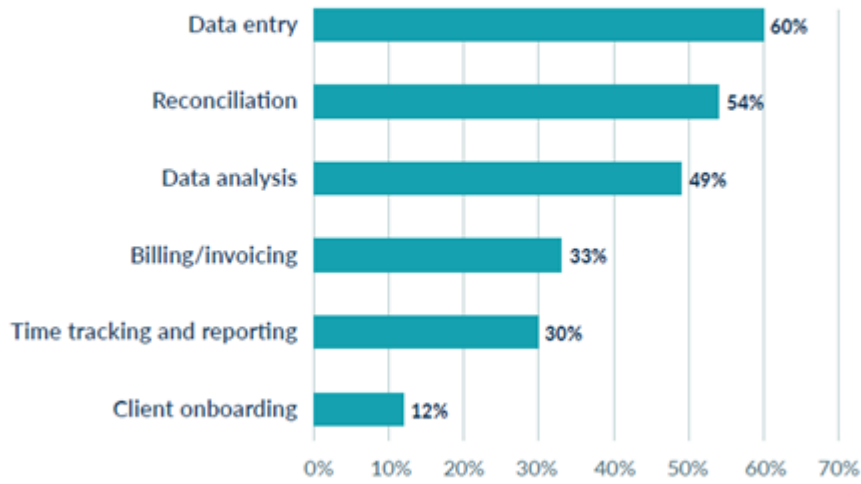

The movement towards more technology investment for accountants is driven first and foremost by the need for efficiency, streamlined workflows and added value to their business, according to the latest [Annual Accountants Survey: Top Challenges & Tech Wishlist](#) from accounting technology provider, [LeaseQuery](#).

LeaseQuery's Annual Accountants Survey: Top Challenges & Tech Wishlist polled 237 accounting professionals across public, private, nonprofit and government organizations on their technology maturity, wishlist and areas for growth. When asked about top priorities, improved accuracy and compliance was the top choice of

accountants surveyed, followed by lower costs and faster delivery. It's no coincidence

### Job Functions in Need of Automation

Accountants have a long automation wishlist, with data entry, reconciliation and analysis at the top. Automation eliminates the need for manual tasks, from data entry to time tracking, enabling accountants to devote more time to higher-value work. As accountants' roles become more analytical, automation is a critical strategy to meeting those needs. While fewer than a majority of the responding accountants included billing and time tracking on their automation wishlist, 80% indicated that they currently use technology to support expenses and accounts payable, and 77% noted they already use technology for billing and accounts receivable tasks.

While fewer than a majority of the responding accountants included billing and time tracking on their automation wishlist, 80% indicated that they currently use technology to support expenses and accounts payable, and 77% noted they already use technology for billing and accounts receivable tasks.

“The maturity of accounting technology is clearly progressing,” said [Jennifer Booth](#), VP of Accounting, “however, massive opportunities to gain efficiencies remain. For

instance, one of the first measures of technology maturity is cloud adoption, and

the year ahead.

The cloud is generally regarded as the safest option for data storage, which ties back to the need for accountants – both from industry-specific organizations and accounting firms – to migrate their data, which is the first critical step in the digital transformation journey.
